

Acoustic Cloud Panel (CLP) combines fabric or vinyl material and sound absorbing acoustical fiberglass to create a beautiful suspended ceiling panel for your particular setting needs. The sound dampening qualities of hanging clouds is extremely effective.

Shapes and sizes may vary dependent upon your specific needs. Drawings with sizes will be required to accurately manufacture your clouds for your specific project.

Standard size for Cloud CP-1" or CP-2" panels varies.

## CORE

6-7 pcf fiberglass  
1" or 2" thickness

## SIZES

Custom sizes and shapes as requested

## MOUNTING

Back mounted with screw-in clips secured to substrate with [Rotofast Cloud Anchors](#) and Caddy wire for hanging.

## FINISH

Fabric  
Vinyl

## EDGES

Square  
Round or Custom shapes upon request  
Hardened Edges  
Beveled  
Painted Edge

## FIRE RATING

ASTM E84 Class "A" materials

## SOUND ABSORPTION

Hz	125	250	500	1000	2000	4000	N.R.C.
CLP-1"	.10	.25	.84	1.08	1.13	1.11	0.85
CLP-2"	.42	.89	1.12	1.07	1.10	1.09	1.05
